Info for you're and your vendors!

Municipalities and their Budgets

The great majority of municipalities are working on their new budgets and are ready for another year of serving their public. Across the board the cities, counties, and various types of districts are facing reduced revenues and the need to control their expenses and maintain their cash reserves.

Municipal Lease/Purchase financing allows them to pay for needed equipment over time and that is the same benefit that we have discussed with commercial clients for decades.

And there are more benefits for them...

- Tax Exempt Municipal rates are very low
- Flexible repayment terms are readily available
- Leasing does not require voter approval
- There is no long term debt created (leases are an expense item)
- Their choice of Master Lease formats and funding into Escrow

Whether they need a single piece of equipment or need a major project financed, you have access to a flexible source of funds for them.

E-mailing me, at tcadle@leasource.com will get you answers and more information within hours - not days.
